## Up and Coming Events

**January 20-24th**  
BICSI  
Tampa, FL

**February 19-21st**  
CalCom  
Sacramento, CA

As 2012 comes to a close, we want to take an opportunity to thank you for your business and the opportunity to serve you. Amidst another year of progress and change across our industry, we are grateful to have had the opportunity to expand the KGP family this year with the addition of BlueStream Professional Services. We are excited about the collective value KGP and BlueStream offers our Customers. While we are heading into a New Year, our promise to you remains unchanged; we will continue to earn your business each and every day, and we will strive to provide an unmatched experience to you, our valued Customers.

Thank you for your continued support and confidence in KGP Companies. We do not take it for granted.

Wishing you and those that mean the most to you a season filled with peace, hope and happiness.

## Web Tips

### Order Status – The latest

- Additional “order status” descriptions at the line level now include: Open, Shipped, Partially Shipped, Future Order, Backorder and Drop Ship
- Tracking numbers now link (when possible) directly to carrier websites
- Serial numbers can be viewed for serialized items by clicking on the number under “Cont. Qty.” (container/quantity) column from Shipment Details
- Packing slips can be viewed and printed
- Order discrepancies can now be reported electronically via a “Report Discrepancy button”

- Invoice numbers are now provided at the order and line level

### Encell Smart Power System

Encell has developed a revolutionary active battery management solution called the Smart Power System that proactively manages, reduces power consumption and substantially extends the life of a customer's lead acid batteries.

This innovative approach to battery management provides: smart charging, remote testing and maintenance delivering intuitive graphical analysis to the fingertips of the state of health of all managed batteries. Encell's technology not only offers real operational savings, but also reduces battery-purchasing cycles and lowers energy consumption at every location. This scalable, carrier-class solution is a fit for multiple markets requiring back-up power.

#### Benefits include:

- Battery life extensions
- Remote monitoring
- Reduced power consumption

#### Markets:

- Telecom
- CATV
- Datacenters
- Power & Utilities

- Reduced battery recycling
- Transportation
- and more . . .

## Premier

PREMIER Cat5e Station Wire is constructed with a tough PVC jacket for indoor/outdoor applications that provides additional protection when exposed to outside weather conditions. This station wire is resistant to cracking after long-term UV exposure.

PREMIER Cat5e station wire is made from 24 gauge solid bare copper conductors that are individually insulated with semi-rigid PVC. These additional protection features increase the life of the cable.

## Introducing TE's NG4access ODF Platform

**Introducing TE's NG4access ODF Platform**  
**Industry-leading density, superior access and faster installation.**

The [NG4access ODF platform](#) is an innovative new solution designed to address the complexities of fiber-heavy offices, head ends and data center environments. From minimizing your labor requirements to faster deployment and delivery, the NG4access ODF was designed with innovation and accessibility in mind.

### Key Benefits

- Manage your high density networks - NG4access ODF offers industry-leading termination densities
- Modularized functionality enables rapid cable routing and connections as well as build-as-you-grow fiber capacity
- Designed for easy technician access to all cables and connectors for rapid installation, turn-ups and maintenance
- Superior performance - reduced bend radius fiber reduces attenuation caused from tight bends and frequent handling. Low-loss connectors help maintain optimal network uptime.
